

PRECISION MECHANICS SINCE 1980
CUSTOMISED SOLUTIONS FOR EVERY CUSTOMER

CHOOSE THE
PRECISION
AND QUALITY
OF CMS MECCANICA
TONON SRL
MANUFACTURING

OUR COMPANY

Quality and innovation: CMS Meccanica Tonon has been involved in **precision machining** at an international level since 1980. We are specialists in the **machining of all metal and plastic materials** (including nickel, titanium and hardened materials) with series production of medium and high complexity parts.

In addition, our team **develops assembled projects** including the purchasing and assembly of commercial components (e.g. pneumatic systems).

40 YEARS OF EXPERIENCE MAKE ALL THE DIFFERENCE

Machining of all metal and plastic materials (including nickel, titanium and hardened materials)

Mass production of medium to highly complex parts

Development of assembled projects with procurement and assembly of commercial components

Possibility of production service and shipment within 24-48 hours

Temperature-controlled metrology room at 19-21 degrees, with CONTURA G2 ZEISS measuring machine

More than 600 calibrated measuring instruments at the disposal of quality control operators

A LONG HISTORY AN INNOVATIVE COMPANY

Cutting-edge technology, quality and reliability to offer you the best: **CMS Meccanica Tonon** is a company that looks back on **40 years of solid experience** and always keeps up with the latest developments in the sector.

We maintain constant contact with the most prestigious and renowned companies, which support us in **galvanic treatments** and the supply of **quality materials**. We also boast a large automated warehouse for storing goods.

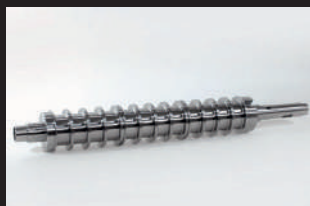

PETROLEUM SECTOR

MARINE SECTOR

FOOD SECTOR

PACKAGING

AUTOMATION

PRECISION COMPONENTS FOR THE MARINE, OIL AND FOOD INDUSTRY

The **expertise and reliability of our staff** are the result of our constant research in the field and natural inclination towards continuous innovation. This is what makes us your ideal partner in the field of precision machining.

From its foundation to the present day, CMS Meccanica Tonon has worked constantly to expand its range of products and we have become a **benchmark in the field of precision machining**.

The possibility of **processing hypoallergenic materials certified** for contact with foodstuffs has allowed us to work with companies that produce machinery and systems for the food industry.

OIL SECTOR

Construction of **components for flow control valves**, ensuring high-quality characteristics and guaranteeing a constant, controlled, and precise flow to valves in oilfield installations.

MARINE SECTOR

In particular, we offer piping components, cables, mechanical parts for ship engines and for engine rooms in general. **We work in one-off and series production**, depending on the requirements of our customers.

FOOD SECTOR

Within the food sector, there is a great demand for **precision components made of stainless steel and specific materials** designed to come into contact with food without risk of contamination.

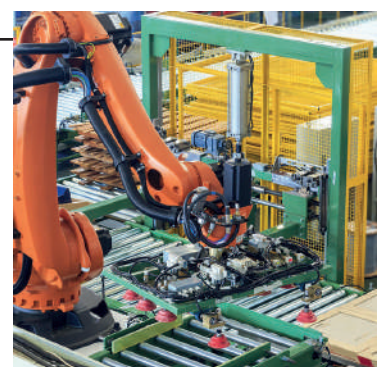

PACKAGING

In particular, we offer **metal and plastic components for packaging machines** or industrial packaging systems: machine bodies, pulleys, shoulders, cams, camshafts, safety blocks and much more.

AUTOMATION

Our plant features workbenches, **CNC machines and state-of-the-art software**, which allow us to deal with every job - from one-offs to medium and large series of 30,000 units.

▶ TURNING

▶ MILLING (5-axis up to 3000x800)

▶ WIRE EDM

▶ DIE-SINKING EDM

▶ RECTIFICATION

▶ QUALITY CONTROL

CMS MECCANICA TONON MACHINING

We are able to guarantee a **very high quality** of workmanship in classic operations such as grinding, milling and turning, employing the same level of care for single units to medium-sized series. Wire and die-sinking EDM are also among the operations we offer our customers.

We also have an in-house department which is responsible for the **production of prototypes**, based on existing mathematical models or samples. **We are able to process all materials, from aluminium to steel** and from alloys to copper and plastics.

WE ARE ACCREDITED UNI EN ISO 9001

In 2000 we received UNI EN ISO 9001 certification for the first time; the body responsible was DNV, accredited by ACCREDIA.

Since then, our quality system has been updated to meet the 2015 criteria.

SERVICES

CMS Meccanica Tonon is able to guarantee an accurate **consultancy and design service**, working on a project basis. We have a large warehouse, where we store the raw materials that are immediately available, and we take care of the **provision of materials** from our suppliers, including the possible purchase of high-quality commercial goods from external companies.

On request we can supply units complete with heat **treatments** (normalisation, annealing, tempering) and **surface treatments** (burnishing, nickel-plating, galvanising, polishing).

It is also possible to affix **trademarks, instructions, and graphics**, with a wide range of customisation options. Our final products are subject to strict quality controls.

CONSULTANCY AND PLANNING

Our staff are qualified and constantly updated to guarantee full support.

ACQUISITION OF RAW MATERIALS

Metals, plastics and other materials are sourced from our network of trusted suppliers.

ORDER ACQUISITION

Our complete service also includes home delivery of the order.

LASER MARKING

This is carried out on the surface of the object under production through an indelible process of lettering and numbering.

HEAT TREATMENTS

Special qualities can be added to metal products thanks to heat treatments such as normalisation, annealing, tempering, etc.

SURFACE TREATMENTS

Burnishing, nickel-plating, galvanising, polishing (including electrolytic polishing), chromium-plating, anodising and custom painting.

ASSEMBLY

Our company offers a professional assembly service in order to deliver you a finished product.

SPECIFIC PACKAGING

Packaging is carefully designed and customised according to the product in question.

LOGISTICS AND TRANSPORT

Our company takes care of everything, including the organisation of transport and the home delivery of goods, throughout Italy and internationally.

CONTACT US

CMS Meccanica Tonon is your trusted partner for **precision machining** with any material.

We offer an extensive portfolio of projects and experience, a great capacity for technological innovation, specialist staff, and the latest machinery. This is what makes us your ideal partner!
